

LOVE OUR FLOORS, LOVE YOUR PLANET

AMOR CASA AMOR TERRA

AMORIM

# AMORIM

| AZULEJO CITYZEN

If this were your floor, you would have prevented  
OVER A TONNE OF CO<sub>2</sub> from entering our atmosphere

# AMORIM

This floor is so QUIET AND PEACEFUL to walk on, you could just whisper that it stored 1,395 kg of CO<sub>2</sub> while growing as cork

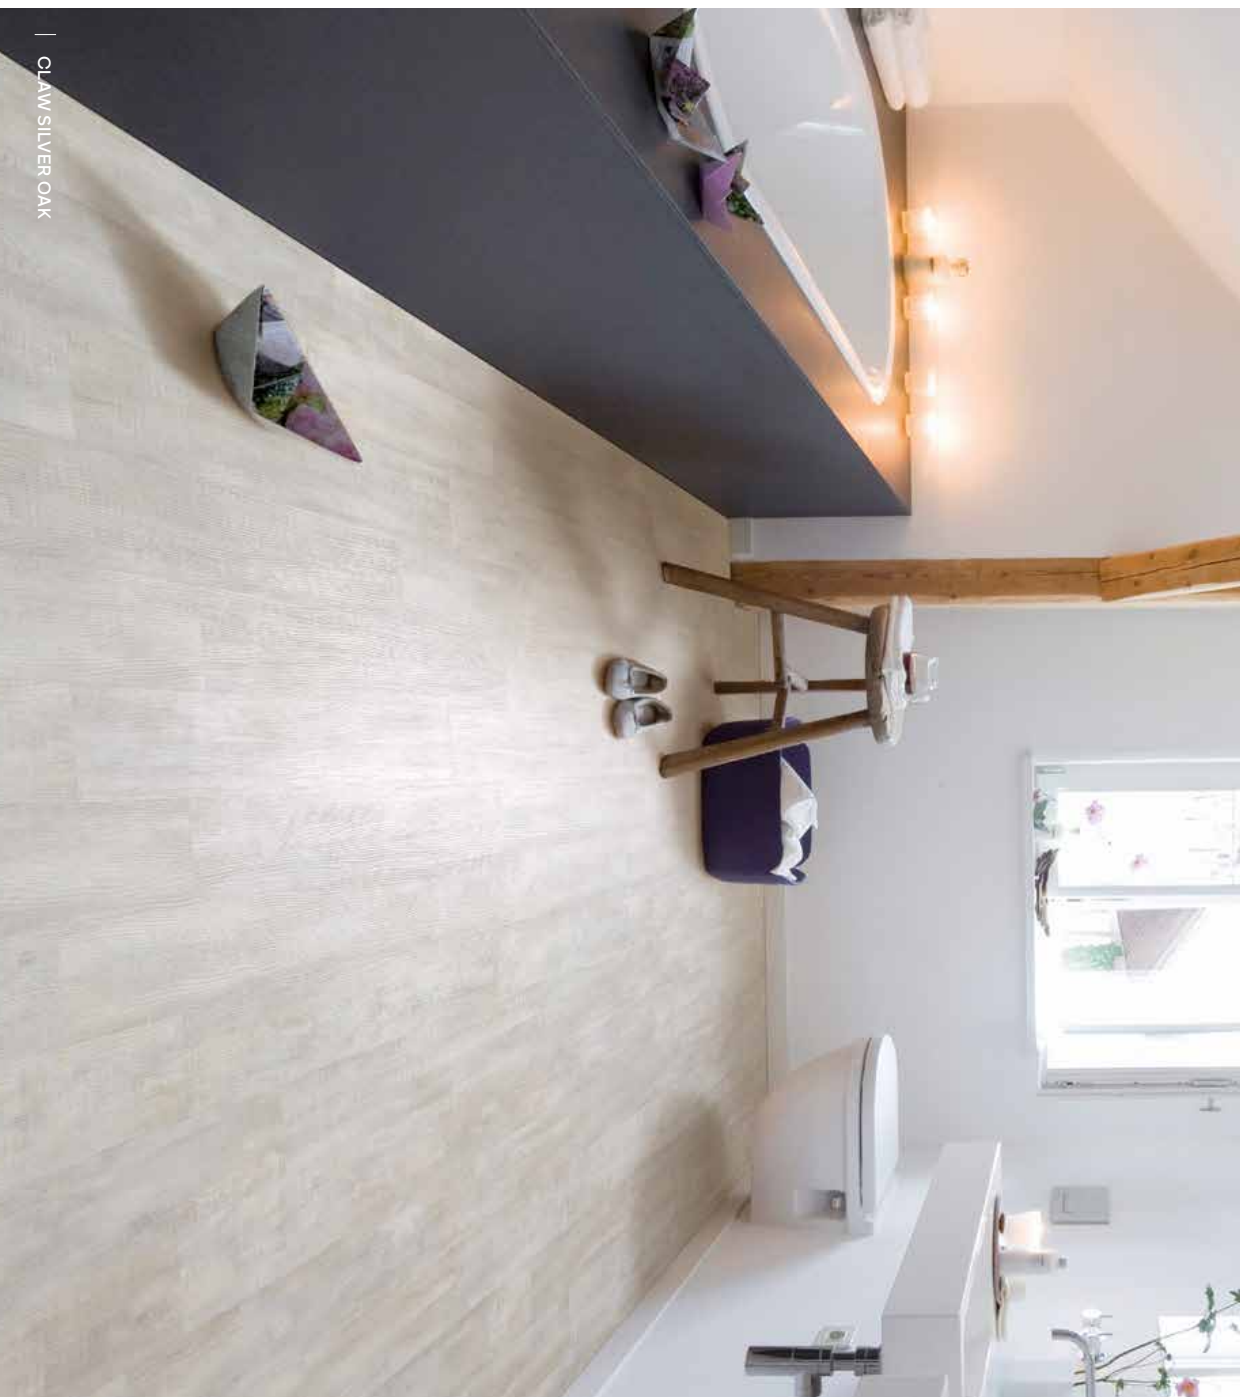

| RUSTIC FAWN OAK

And this one is beautifully **WARM AND COMFY**  
underfoot – perfect for lively family life, like all our floors.  
You can tell the kids about the CO<sub>2</sub> saving later

# AMORIM

| CLAW/SILVER OAK

As you have seen, when you lay a beautiful Amorim floor, you're not just being carbon neutral, you're actually being carbon negative. Your floor, while growing as natural cork on the tree, has removed many times its own weight of CO<sub>2</sub> from the atmosphere.

When laid in an average sized room, then, a beautiful Amorim All-Cork floor can represent a saving of 1395kg of CO<sub>2</sub>!

Please enjoy browsing our range on the next few pages.

# AMORIM ALL-CORK

## WOOD DESIGNS

AS BEAUTIFUL AS NATURAL WOOD yet warmer and more comfortable, and a lot more planet-friendly.

CHOCOLATE BROWN OAK

BEACH HOUSE

Here are 14 finishes to suit any lifestyle, whether urban loft or country house, family home or city townhouse.

Choose an Amorim All-Cork wood design when you want style that's easy to live with (and have no objection to saving 93kg of CO<sub>2</sub> for every square metre you lay!)

## STONE DESIGNS

| CONCRETE NORDIC

| AZULEJO CITYZEN

STONE FLOORS LOOK  
REALLY STYLISH.  
Then you walk barefoot on  
them one cold morning.  
Or drop something on them.  
Or try to tiptoe quietly  
across the room!

Our 4 stone designs are different.  
They look just as good as the real thing  
but they're cork, so they're easier to  
live with - warm, quiet and comfy.  
Better yet, they're good for planet  
Earth - every square metre has  
prevented 93kg of CO<sub>2</sub> from entering  
the atmosphere.

CARING FOR OUR PLANET is the most important thing, but it's not the only thing. When you love your home, you demand comfort, warmth, resilience, long life and beauty too. Amorim floors give you all this and more, so here are some quick reminders.

#### WARM UNDERFOOT

Cork is a natural insulator and feels lovely and warm to the touch, even in winter. You'll never have to do that early morning cold-feet dance with Amorim!

#### COMFY TO WALK ON

Until you walk on an Amorim floor, you won't believe how comfy they feel. Kids love to play on our floors. In tests, only carpet was judged as softer underfoot!

#### EASY TO LOOK AFTER

Amorim floors are totally waterproof and really easy to keep clean. Treat them as you would an ordinary hard floor – they can take it!

#### STAYS BEAUTIFUL FOR YEARS

Amorim floors are really hardwearing. Even though they're comfy and warm to walk on, they are classed as 'heavy domestic', so they'll look great for many years.

#### EVERY STEP SAVES CO<sub>2</sub>

Amorim floors really help our planet. While growing as the bark of cork oak trees, they prevent many tonnes of CO<sub>2</sub> from entering the atmosphere and contributing to global warming.

Don't forget to visit [amorcorkflooring.co.uk](http://amorcorkflooring.co.uk) and while you're there, try room view to see how Amorim floors will look in your home.

AMOR CASA AMOR TERRA. As we say in Portugal!

# AMORIM

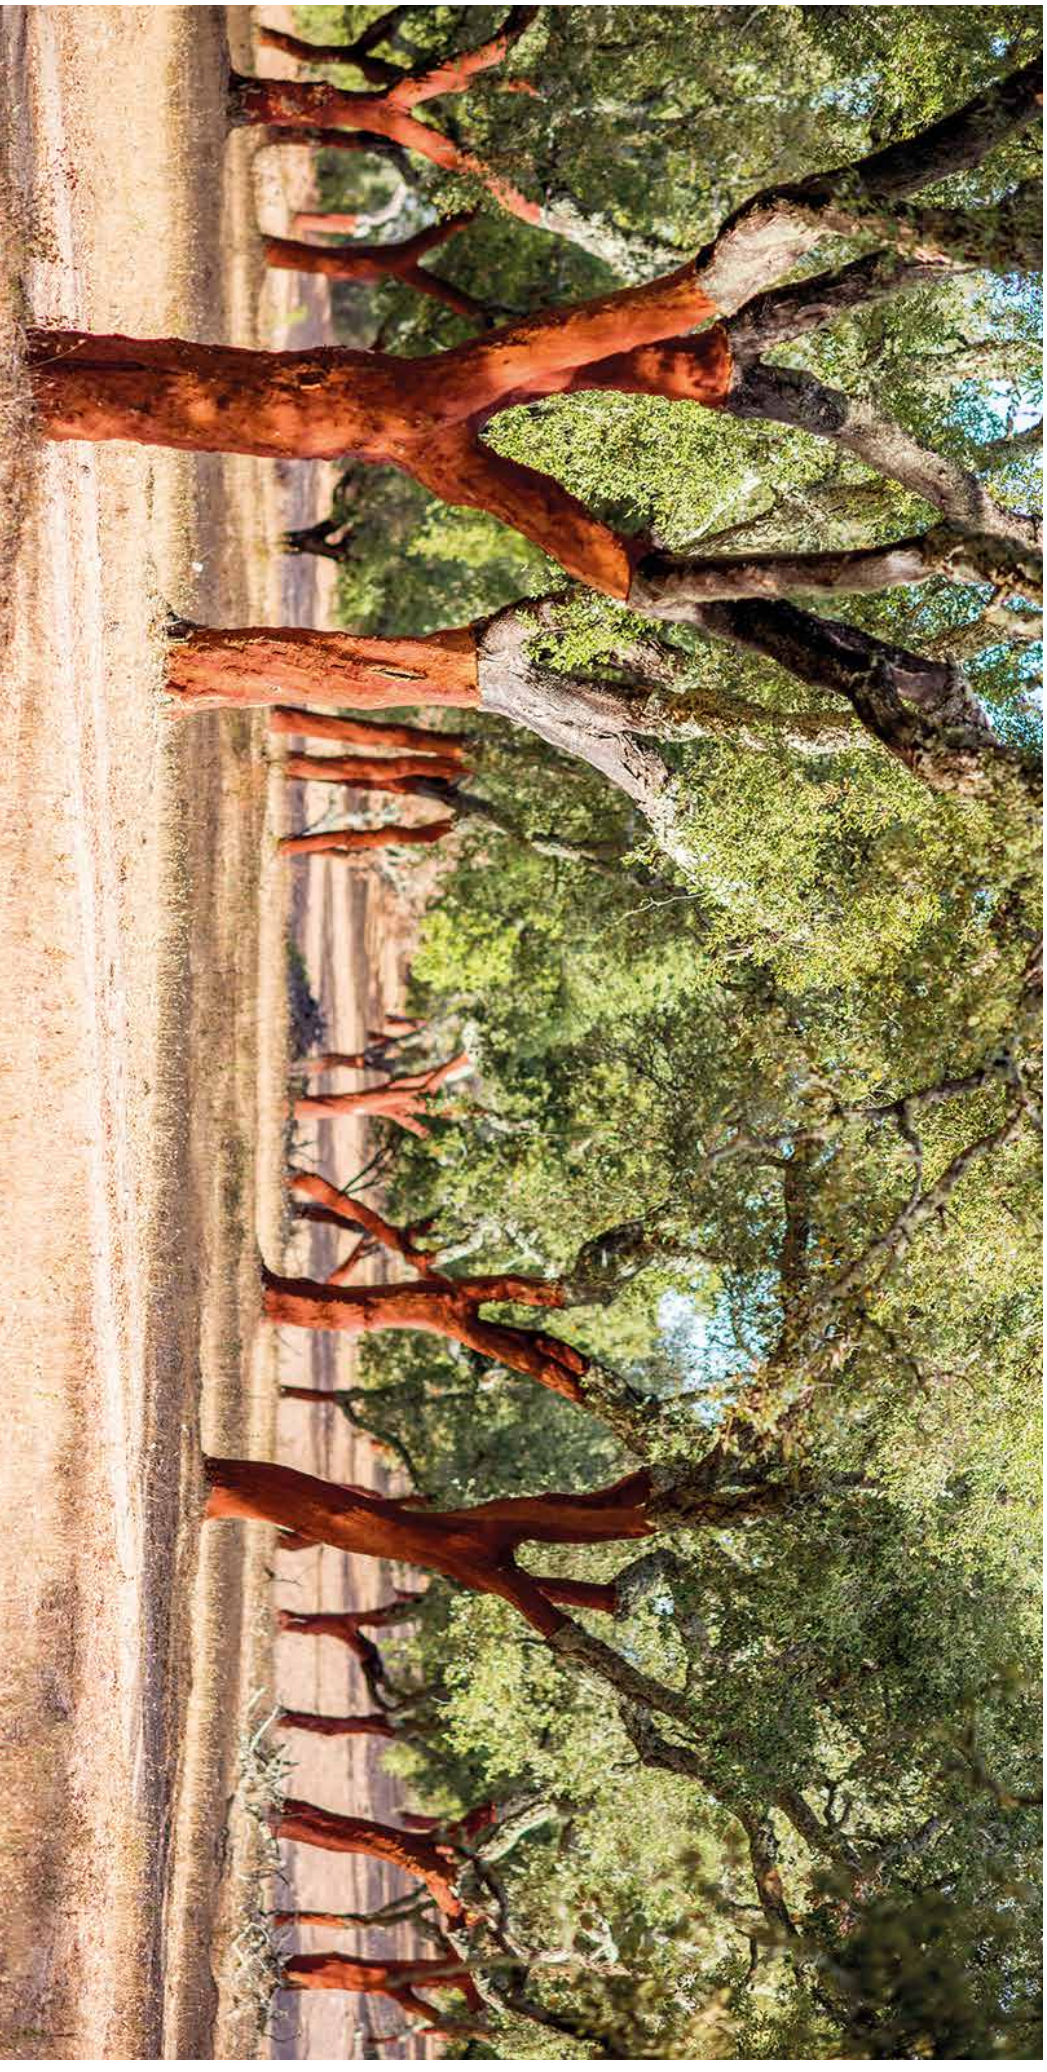

One large hotel group sends used wine corks from their 300 bars and restaurants to our factory, where they are turned into cork floors and wallcoverings for the group's new and refurbished hotels.

AMORIM HAS BEEN PART OF THE CIRCULAR ECONOMY FOR 150 YEARS. Raw material regrows every decade or so. Waste is recycled. Energy for manufacturing is biomass generated. Cork dust and stoppers are re-used.

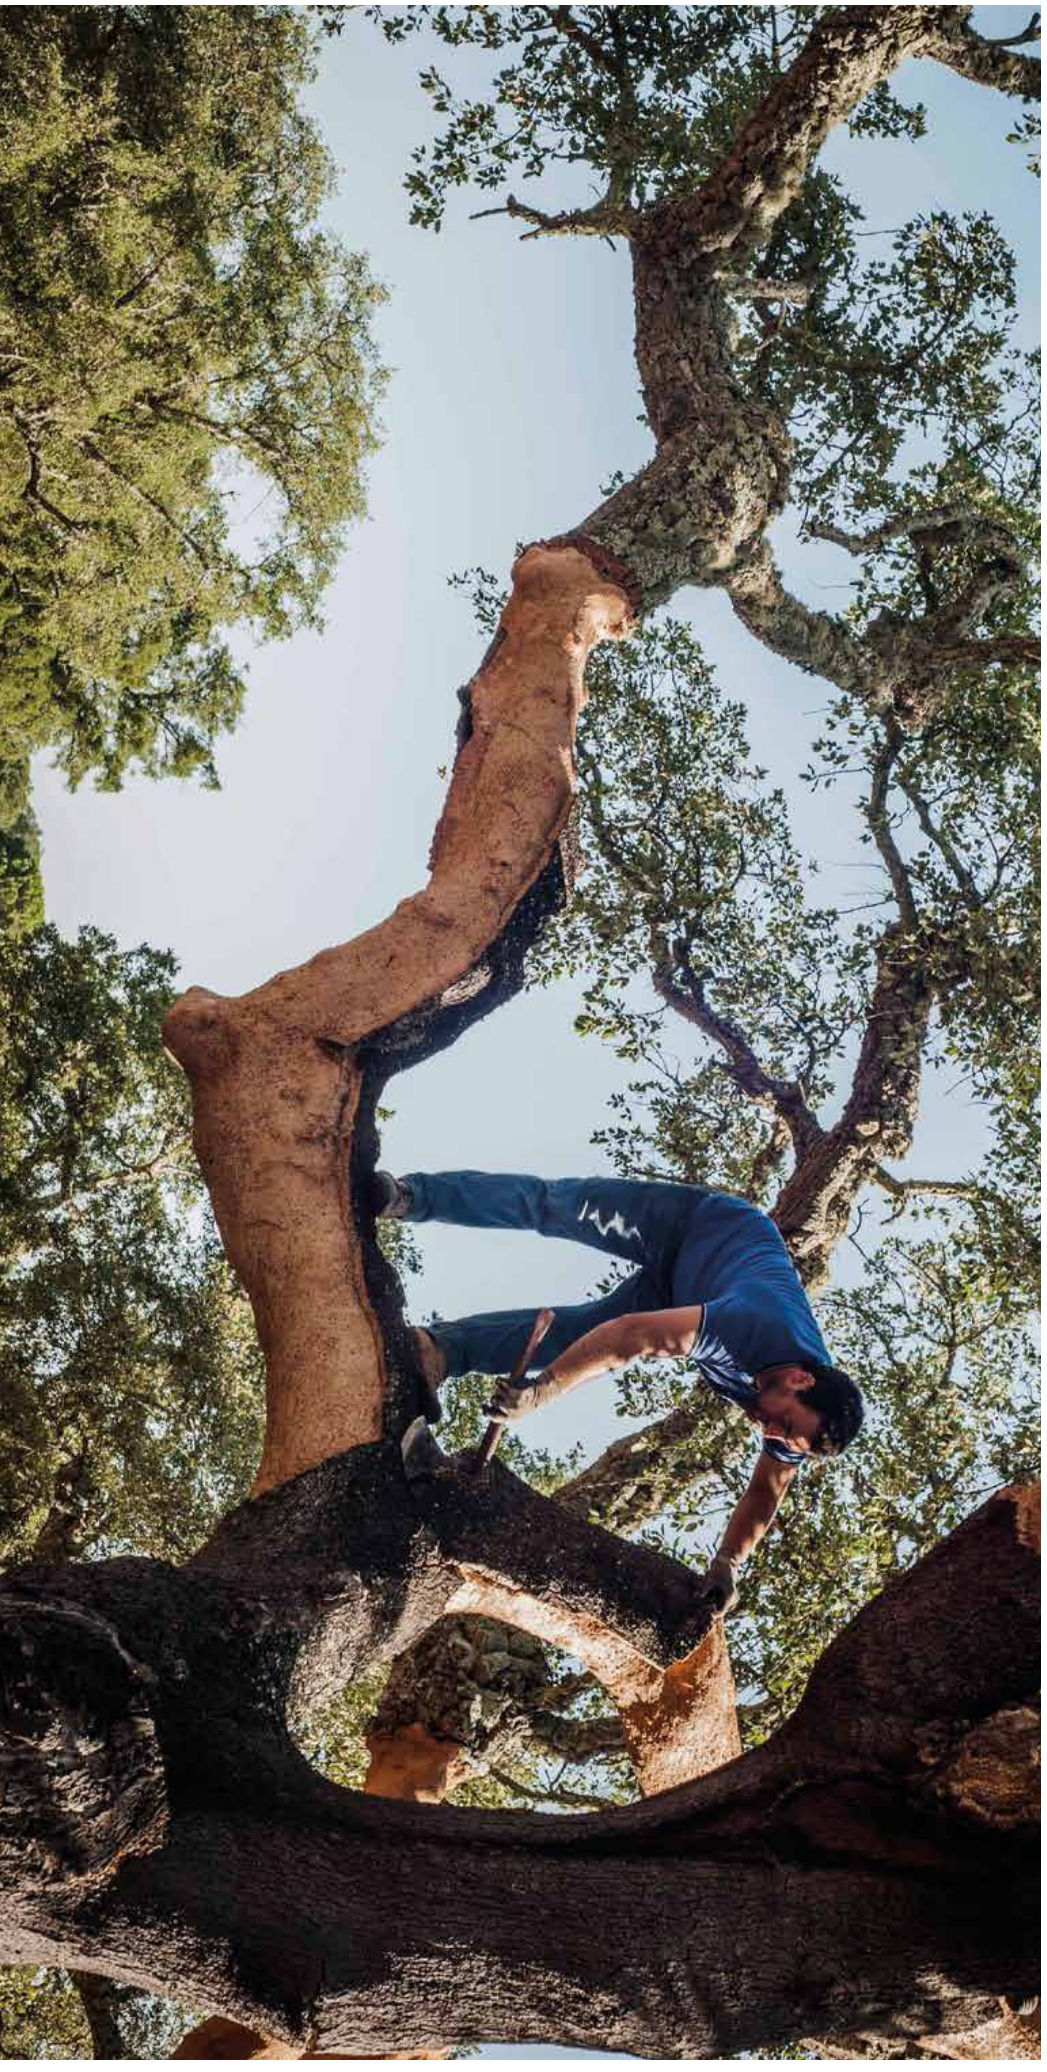

WELCOME TO OUR CORK OAK FORESTS. Every year, they remove about 14 million tonnes of carbon dioxide from the atmosphere.

This has been true for centuries, of course, but we – like you – are delighted that the world now knows how vital this is.

# AMORIM

OUR BEAUTIFUL TREES LIVE FOR 250 YEARS, taking in CO<sub>2</sub> and storing carbon all that time.

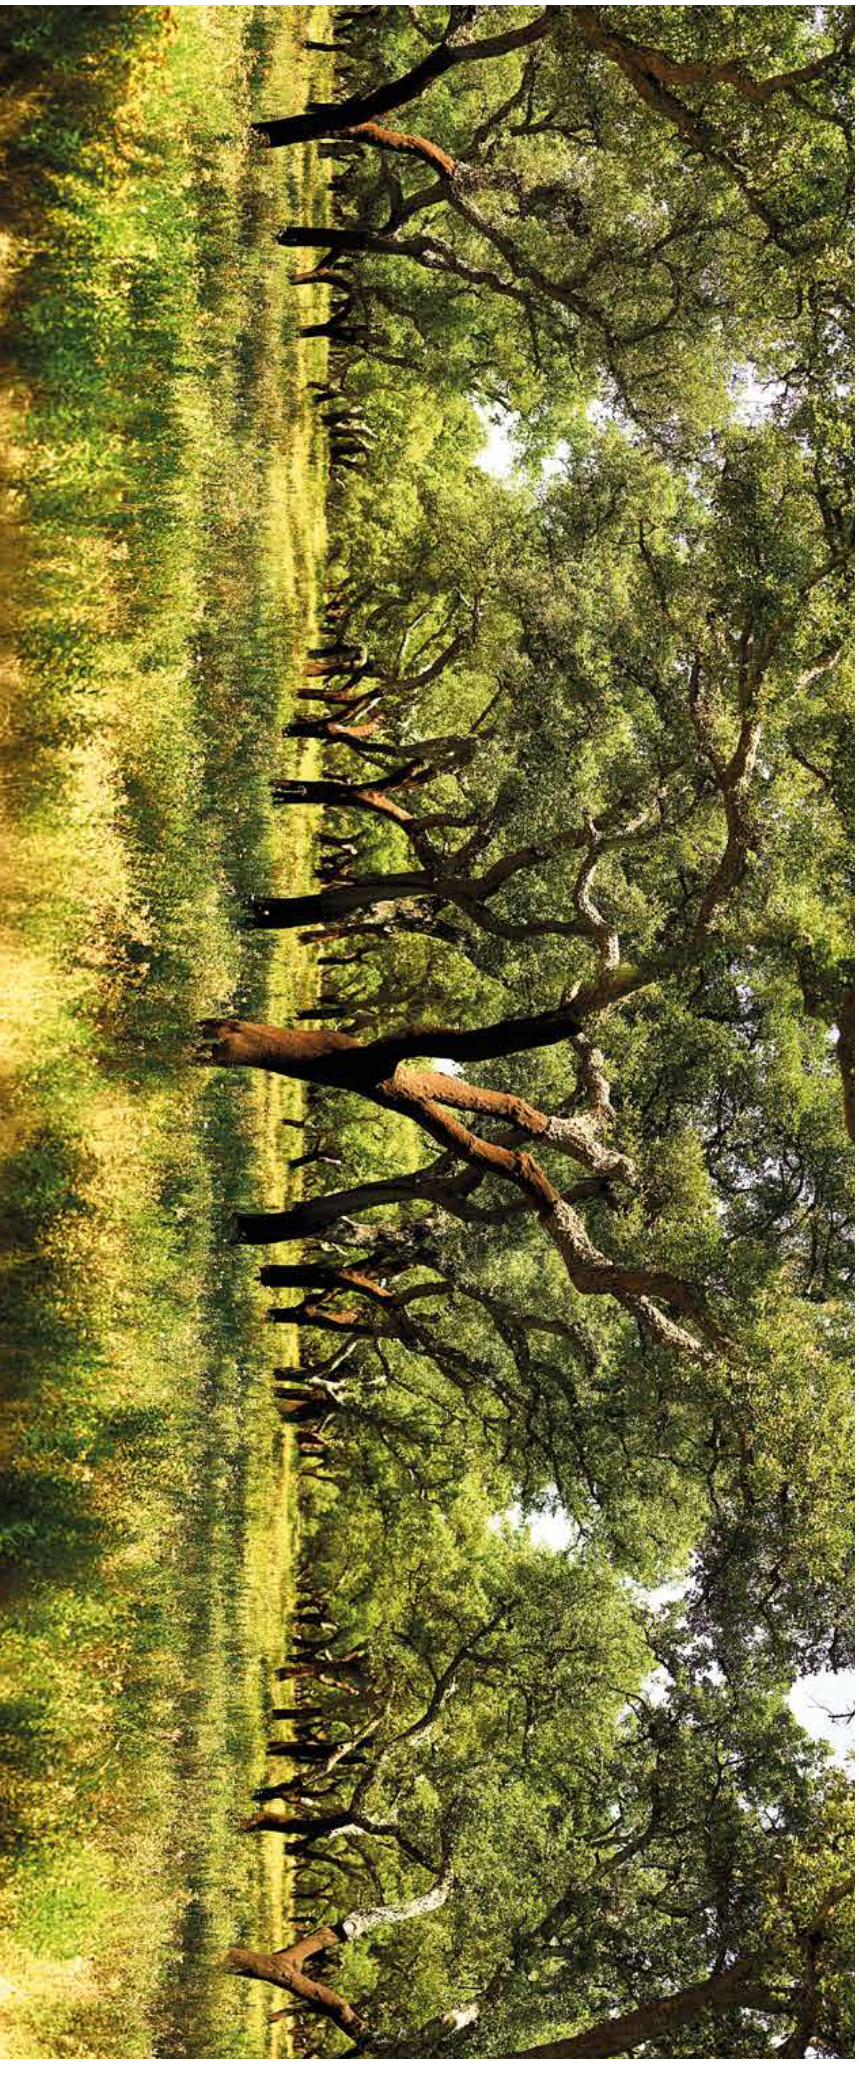

We harvest their bark (the cork) many times during the life of each tree and this helps the tree remove many times more CO<sub>2</sub> from the atmosphere than the weight of all the cork we take from it.

CORK HAS BEEN HARVESTED THE SAME WAY FOR CENTURIES  
– by hand, by expert foresters who are so skilled, they are currently the  
highest-paid agricultural workers in the world!

LOVE YOUR PLANET, LOVE OUR FLOORS
