TRIPLE LAYER UNDERLAY

Help to significantly extend the life of your new carpet by fitting Axfelt Triple Layer Underlay.

Axfelt Triple Layered Underlay is a luxury underlay with a wool felt topping, mixed material middle layer and a rubber crumb bottom layer.

It provides an excellent foundation for your new carpet to help prevent wear and tear, increasing the life of the carpet and maintaining its looks.

We believe that Axfelt is the perfect partner for your woven Ulster carpet. So much so that we will extend your guarantee when you buy the two together for your home. Talk to your retailer for more details.

TRIPLE LAYER UNDERLAY

Fitting Axfelt Underlay also delivers excellent sound and warmth insulation helping reduce noise and heating bills.

Made from 100% recycled materials including old carpets, yarn, wool and rubber tyres, Axfelt Triple Layer Underlay is a sustainable product, designed to make a contribution to the reduction of the amount of carpet currently disposed of in landfill in the UK.

TRIPLE LAYER UNDERLAY

## 100% Recycled three layered content:

The top layer is all recycled yarn and wool fibre, the mid layer is recycled wool yarn and wool rich carpet waste and the base layer is rubber which is from recycled lorry and tractor tyres. A great reuse for all of these waste products.

**3 Layer Construction:** Most similar products on the market are made of a two layer construction. This three layer construction is particularly good at crush recovery and independent tests show it is the best performer in this regard (as per BS4052).

**Insulation:** Wool, as a fibre, is a great insulator on its own. The three layer construction makes this even more effective giving it excellent thermal insulation properties (2.7tog) and sound insulation too (32db).

TRIPLE LAYER UNDERLAY

**Support:** Felt is particularly good when used in conjunction with woven carpets as there is a velcro effect between the top of the underlay and the woven backing itself. This helps to secure the carpet in place once fitted (unlike smooth surfaces on many foam underlays) and reduces the likelihood of movement over time. In addition felt is particularly good at allowing seams to bed in and are much less pronounced once the carpet has settled after installation.

**Durability and longevity:** Axfelt is contract rated so will provide long term support in carpet performance therefore extending the life of the carpet as a result.

*Not suitable for underfloor heating.*
